

PROJECT PROFILE

Work by O'Brien

Construction of industrial warehousing, Brierley Hill. The contract consisted of extending both ends of an existing warehouse that stored coils of steel weighing between 25 and 40 tonnes each. The coils were delivered into the warehouse by train on an internal rail line.

To ensure no disturbance to the client, works had to be carried out during holiday shutdowns. The first phase, over a four day Easter shutdown, consisted of removal of the rail line, reduce level excavation, foundation pads, ring beams, holding down bolts and floor slab construction under the rail lines.

The works were carried out with gangs working 24 hours a day on 12 hour shifts in conjunction with Network rail.

The entire project was successfully completed to standard and within the agreed time frame and a letter of appreciation was received from Mowlem.

Client
Mowlem

Project
Industrial Warehouse

Location
Brierley Hill

Value
£740K

Contract Duration
12 weeks
